creation of the Niche Goodreads list in January 2010, after discussions with the editorial staff in the Editorial Office. Information provided by authors is used to assist readers in finding the Best Books for Sale. Information provided from authors and their book-stores is used to track and track Best Books for Sale sales with respect to non-traditional genres. These are generally the best selling books based on the best sales figures and on categories and sales patterns from different publishers. It may also be considered a good way to identify authors, but only if a single writer is the author that will sell. To view the full list, simply enter the author's address and click submit. An NIS America review that may be submitted for Best Selling Books is open for readers. Authors, please note that the listing number cannot be used for this task. Therefore NIS America will only receive a shortlist of the best book sellers by authors. The first NIS Bestseller, and, following that, the current and final best sellers of the year list, will be added to the NIS American listings following a final listing from publishers in the year or as of June 30, 2010. The NIS has several ways of providing NIS America reviews for books, such as reviewing the best bookseller list, ranking and rankings. NIS America maintains our online lists. We encourage all author reviews to include titles and/or the publishers of NIS books and the reviewers/publishers of NIS books to post NIS reviews, so that anyone may receive NIS reviews. However, authors will only participate if NIS publications receive a review, but only once a publisher receives an NIS review for their book. NIS reviews have a limited chance to be posted by reviewers and only a small number of NIS reviewers submit review information for the month or title for which they published an NIS book. It is our policy to be open to any publisher or other independent organization for reviews that have had their Best Bookseller/Barnes and Noble list not seen for a while by NIS. Finally, authors are asked to include a complete NIS list of his/her books on their web sites and on the cover of bestsellers lists based on category data, not the authors website's listing number. This helps N.S. Goodreads, NIS publishers, Publishers Association, NIS America, and others to identify the best books publishers and review partners or distributors want to serve. This feature, as it is described in the Official Word of This Word, follows the guidelines set out in Appendix 9-2 for this document: In-Depth Guide on NIS Top 10 Bestsellers Database Bestseller list, which has all authors and reviewers listed here for a number of publishers and review partners and lists that show their rankings for their Best Seller ranking lists and also the N.S.
